

I am Rachelle and about to graduate from St.Dominic Catholic High School. In the terms of school, my grades were common, but I was good at art fields and usually devoted at the classroom decoration. Though I liked Art, I liked English the most and spent much time on it. Also knowing my goal - Major in English at university, I attempted to catch chances to enhance English abilities. Like as following,

- speech contest- practiced my oral every day, won many good prizes
- YouTube channel- created English Song Channel, uploaded an English song once a week- gained more than 1 thousand subscribers in total, with the most popular song having 1.5 thousand views
- English Composition- won the third prize of National English Literature Award in 2020
- Publications- English Poems in School Magazine
- Certificate- TOEIC Test- 850

It's so amazing that I was awarded the title of the most improved and outstanding student at commencement. Meanwhile, I thought of a proverb which says, "Strive for progress, not perfection".

Except the above experiences; I had been the Director of Guitar Club in Grade Two. During the time, I learned how to communicate properly, and organized the activities well. Unexpectedly, I made several good friends then. To sum up, I enjoyed my senior high school days. Through the countless experiences, I gradually gained the ability and could apply them into the real life.

My parents run a restaurant, that's why I look nearly fat. Due to the business affairs, they are seldom home; this pushes me quickly to become an independent person. Once my family fell into economic troubles, my parents performed highly positive attitude, their courage and optimism keep the deeply impressions on my mind. So, I tend to solve the problems instead of ducking out of them because of them.

In my spare time, I do something relating to English, like songs, movies or attend some activities. Moreover, I used to go hiking or jogging to relieve my pressure.

Mention to my priority of university is National Chi Nan University, the reason is its beautiful campus; specially within the cherry blossoms seasons. I plan to select English department courses because I am interested in knowing the western culture more and

believe it can broaden my horizon. After university, I may keep learning law and commercial courses. I think knowledge boosts people and keeps us from being ignorant. Now I am looking forward to becoming a freshman, because the Covid19 separates people from staying together. I hope it can disappear quickly so that everybody returns to the normal. At last, I thank sincerely for reading my applying resume. Hoping to see you soon.

I
